

**ACTION FUEL &
EMISSION REDUCTION INC.**

*Reducing Energy Costs/ Lowering Emissions
and Improving Water Quality*

SAVE MONEY

The AFER System can help your business reduce costs by increasing the combustion efficiency of all your gas-powered equipment. The gas burns cleaner and hotter. By burning hotter, your equipment doesn't have to work as hard to provide heat. By burning cleaner, there's less build-up of carbon and other waste by-products. Together, this means less fuel consumption, less regular maintenance, and less chance of break-downs.

Hotels. Restaurants. Casinos. Retirement homes. Warehouses. These are just a few of the commercial businesses that can benefit from the reduced costs and lowered emissions provided by the AFER System.

If your business uses any of the following, the AFTER System can benefit you:

- Boilers
- Generators
- Roof-top HVAC units
- Forklifts & tow motors
- Gas space heaters
- Patio heaters
- Gas deck ovens
- Gas convection ovens
- Gas combi-ovens
- Gas ranges & broilers
- Gas steamers
- Gas fryers
